Notes:
The **Scenic Roads** shown on the map were designated as such by the Alachua County Department of Environmental Protection because of their unique aesthetic value. Certain improvements and developments are prohibited on and around these roads.

The **Historic Structures** data is the result of a field survey conducted in 2000 for locating and documenting historic resources within the unincorporated areas of Alachua County. It was funded by Alachua County with assistance from the Florida Department of State, Division of Historical Resources and it is the first of its kind.

The Florida **Historical Marker** Program recognizes historic resources, persons, and events that are significant in the areas of architecture, archaeology, Florida history and traditional culture by promoting the placement of historic markers and plaques at sites of historical and visual interest. Further information can be found on the website of the Florida Division of Historical Resources:
